

WEST NILE VIRUS

Protect yourself and your community.

Dead birds can be a warning that West Nile Virus is present in our mosquito and bird populations.

West Nile Virus is more harmful to people over 50 and to medically fragile communities.

Some of the most likely West Nile Virus bird victims are:

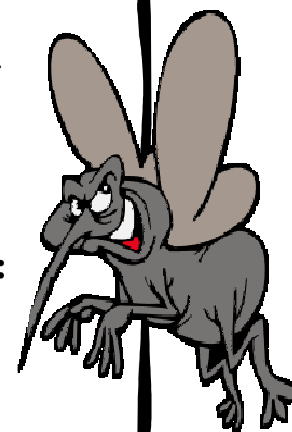

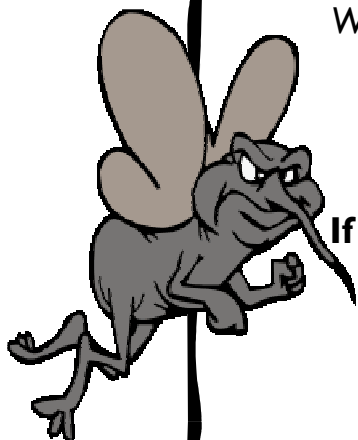

American Crow Raven Magpie Jay Raptor

If you see a dead bird that is a possible WNV victim, please report it to:

the California Department of Health Services

1-877-WNV-BIRD

(1-877-968-2473)
